### ALAN PEPIN

I am an artist and designer. Any line between the two often disappears for me. At a young age, I studied drawing, painting and sculpture, learning to render what my eyes and imagination would see. Relationships between colors. Weight: of various forms and their proportions. The mysterious quality of light.

After almost a decade designing home products for Target Corporation, in 2005 I opened my own design studio, Red Dog Run. Since then, my sole focus continues to be conceiving and creating compelling product collections in lighting, furniture and home furnishings.

Creating for Zeev Lighting allows me to share both of my worlds, art and design, in many new and exciting ways. I am passionate about discovering what's next in the world of illumination, and fusing that newness with handcrafted materials and artistic finishes.
